MURX ELECTRONIC HEALTH RECORDS SOFTWARE FOR ORTHOPEDICS

MURx is designed to help orthopedic doctors in documenting and saving clinical data for a patient along with the patient's x-ray and images.

Our software has inbuilt image editor for the doctor to markup the x-ray and images captured to write clinical notes on the x-ray or image. This will give details about the orthopedic problem.

The software helps the doctor to reduce the time to document clinical findings and store/ retrieve x-ray and images associated with the clinical diagnosis of the orthopedic problem.

Our software aims at increasing the productivity of the doctor so that the doctor can spend more time with the patient.

ORTHOPEDIC FEATURES
